

Vochaa

| A platform that enables suggestions on blockchain projects through quadratic voting.

Voccha

[Github.com/RafaRed/Vochaa](https://github.com/RafaRed/Vochaa)

What Is

Vochaa is an open-source platform aiming to bring quadratic voting to blockchain projects, where anyone can import projects, send suggestions and vote.

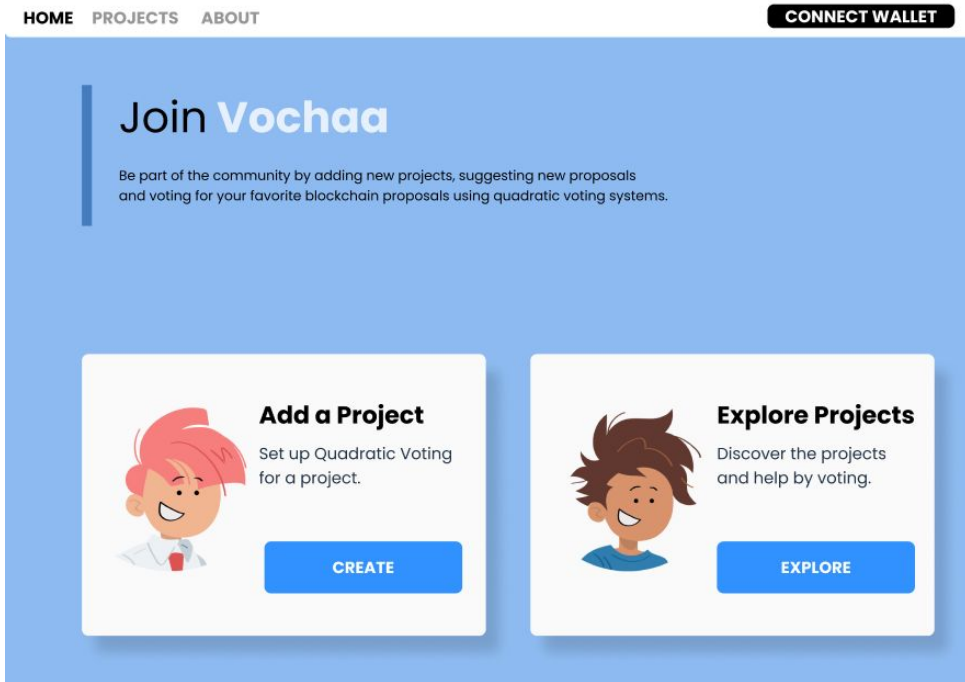

Main Points

- Easy to use.
- Multiple Chain support.
- Spread the concept of quadratic voting to more people.
- Anyone should be able to import projects, create proposals, and vote.
- One vote per wallet, which may in the future be integrated with consensus such as proof of humanity.

Prototype

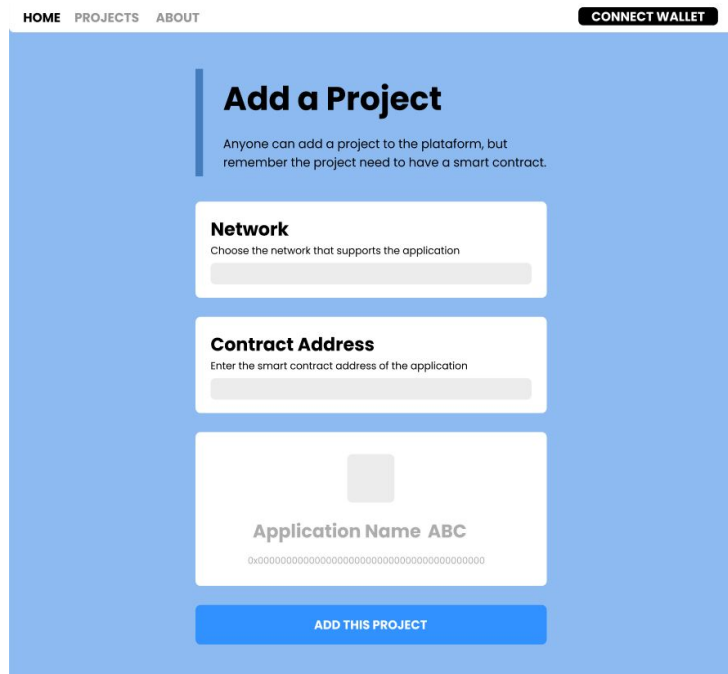

Home Page

The main objective is to show the user what the platform is about and provide the options to **Create** or **Explore** the projects.

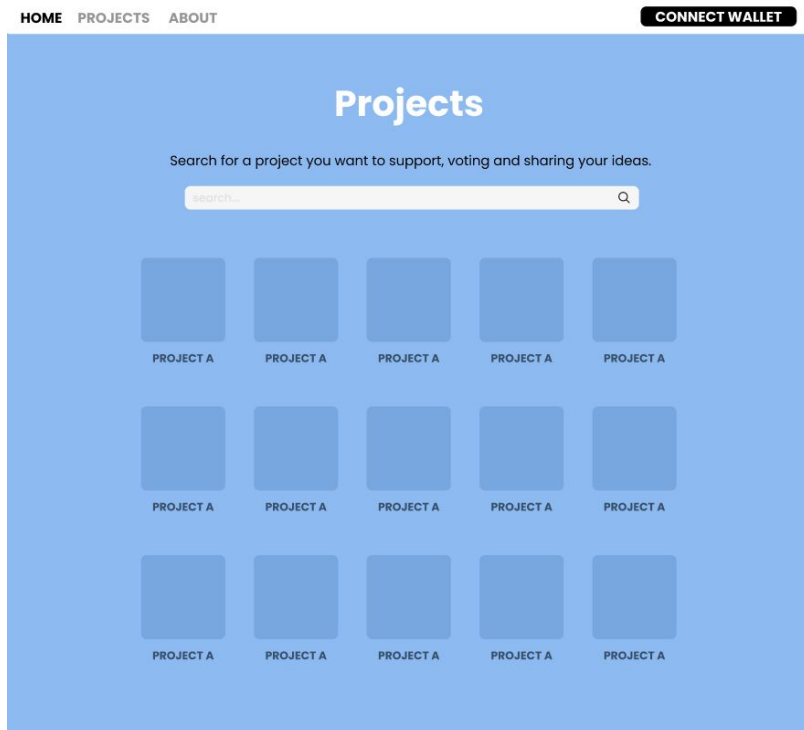

Add a Project

It will be possible to add existing projects from different chains very simply and quickly.

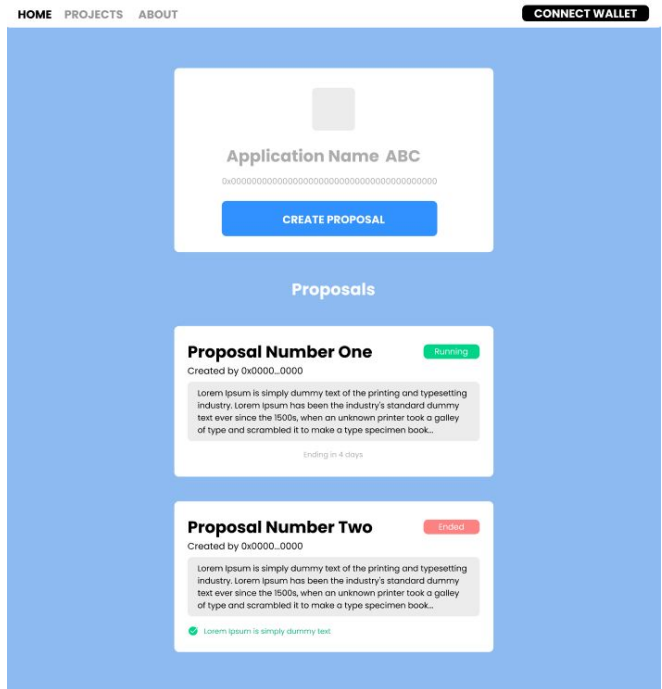

Explore Projects

It will be possible to see and search projects quickly.

Project Page

The project proposals will be listed, as well as the status of each one.

Create Proposals

The creation of new proposals will be very brief, requesting only essential information.

[HOME](#) [PROJECTS](#) [ABOUT](#) [CONNECT WALLET](#)

Create an Proposal

To create an proposal, simply fill out the event settings, add your options, and we will generate you quicklinks that you can share with your audience.

Name

Choose a name for your proposal

Description

Describe your proposal in up to 250 characters

When Will The Vote Take Place?

Select an start date

Select an ending date

When Will The Vote Take Place?

Select an start date

Select an ending date

Credits

How many credits will each voter receive?

Options

Add an option for voting.

This is the option number one

View and Vote

The proposal information, as well as the project it belongs to, will be available. On this same page it will be possible to vote and see the current results.

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
